

ABSTRACT OF THE DISCLOSURE

In some embodiments, a computer accessible medium comprises a plurality of
5 instructions. When executed, the plurality of instructions modify at least a first attribute
corresponding to a first volume, the first volume corresponding to a computer system's
backup state. Subsequent to modifying the first attribute, the plurality of instructions,
when executed, cause the first volume to be created on a first computer system to which
the computer system's backup state is to be restored.
